

Training & Courses

AED

AED Provider

Description

This course is designed for groups that intend to implement a medically licensed Automated External Defibrillation (AED) program. Active Canadian Emergency Training Inc. will provide groups with implementation training and medical direction for AED programs. The AED Provider course teaches the skills needed to manage a cardiac arrest with an Automated External Defibrillator.

Target Audience

This course is designed for group-based first responders.

Topics

- Medical and legal issues
